MULTI TOUCH

MEDIA TABLE MULTI TOUCH

The MediaTable OLED Multitouch was designed as a communication-promoting information and presentation system designed for trade shows, events, showroom and digital signage.

The MediaTable OLED Multitouch is electrically height-adjustable by a remote control and can be moved stepless from a height of 68 cm up to 135 cm and adjusted at an angle of +13 ° / -13 °. This feature makes the MediaTable OLED Multitouch perfect for barrier-free presentation while standing or sitting.

Freely positioned in the room, the MediaTable OLED Multitouch is accessible from four sides and enables collaborative teamwork with multiple users simultaneously.

Thanks to OLED technology, the integrated, ultra-thin HD display impresses with unbelievable contrasts, vibrant colors and the deepest black levels. Furthermore, the OLED display always offers the same good contrast ratio from all viewing angles ensures a brilliant image reproduction from all four sides and in every angle.

The optionally available object recognition software allows the use of 6 to 16 real objects, which are recognized by the display and their movements are processed in real time. In addition, the Touch Software simultaneously processes up to 100 touch points. This links real objects to the digital world and creates a lasting user experience.

FEATURES & FUNCTIONS

- Elegant, ergonomic design
- Robust and high quality materials
- Integrated 55 "full HD OLED display
- Electric, stepless height adjustable
- Perfect black levels
- Brilliant vivid colors
- Perfect picture from every viewing angle

TECHNICAL DATA

- Screen size: 55 "/ 139.7 cm (16:10)
- Resolution: 1,920 x 1,080 Full HD
- Viewing angle: 178 ° H / 178 ° V
- Brightness: 100/400 Nit
- Contrast: 100,000: 1
- Object recognition for 6-16 objects
- Up to 100 touch points
- Power consumption: 190 W
- Media Player: 64 GB of internal storage, CMS system, Content Sync
- Connections: DP, HDMI, RJ45, RS232C, USB
- Dimensions (LxWxH): 124 cm x 80 cm x 68 cm
- Weight: 60 Kg
