DISPLAY SYSTEM

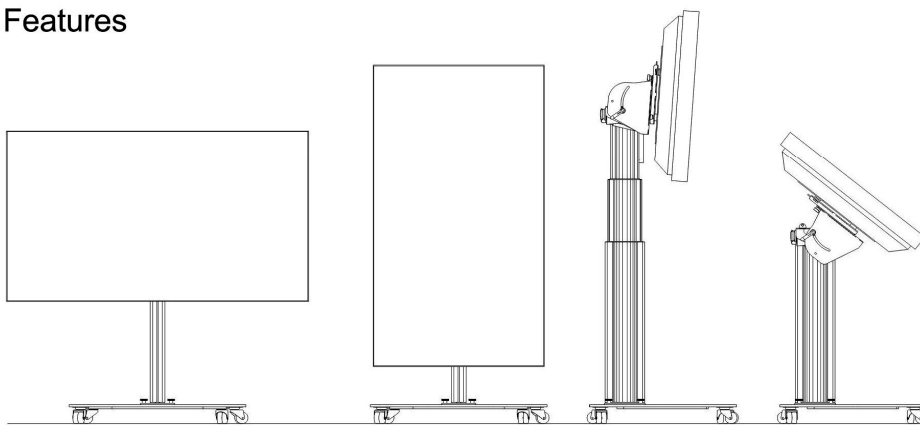

SCREENLIFTER 50

The new ScreenLifter 50 completes our ScreenLifter range and is designed for easy and safe handling of 37" to 70" screens.

In developing the ScreenLifter 50, the focus was on having the smallest possible transport dimensions and maximum flexibility regarding compatibility with as many screen manufacturers and models as possible.

Like its larger siblings, the ScreenLifter 50 also has a continuously adjustable, electrical lifting unit and a practical 90° swivel function. In addition, the ScreenLifter 50 has been fitted with castors with brakes for easy positioning as well as a tilt function for creative use as a teleprompter, touch display panel, lectern etc.
