

SCREENLIFTER COMPATIBILITY CHART

RECOMMENDED SCREEN DISPLAY LIFTER COMBINATIONS

SCREENLIFTER DISPLAY SIZES

30"-40"	40"-50"	50"-65"	65"-80"	80"-95"	95"-108"
SCREENLIFTER 50					
	SCREENLIFTER 75				
		SCREENLIFTER 85			
			SCREENLIFTER 98		
				SCREENLIFTER 103	

NOTE ON WEIGHT INFORMATION

The maximum lifting capacity was declared that the stability is ensured even when the display is fully extended (assembly without wheels!).

The actual maximum lift capacity of our ScreenLifter systems might be higher than indicated (depending on the ScreenLifter model).

Examples:

- When bolted to the floor, the lifting capacity can be increased.
- For touch applications, we recommend using the ScreenLifter 75 without wheels.
- The positioning/ repositioning of the ScreenLifter may be performed only at the lowest display position (barycenter!)

Please note: When using rollers or uneven surfaces such as deep-pile carpets, reduces the stability. For maximum stability, we therefore recommend that you decide - in borderline cases - for the next strongest ScreenLifter system.

We will advise you!
